Descriptive essay

Ask anyone to name his or her favorite wild animal. Some people will choose the most dangerous ones, like lions and tigers. But it is also true that many people will choose the Giant Panda Bear as their favorite animal. It is very different from other large wild animals. Why are pandas so appealing? *Scientists think that the panda is popular because of its appearance.*

Although pandas are a type of bear, they don't look like other bears. They have large heads that are covered with white fur, except for their eyes and ears, which are black. While adult pandas weigh up to 350 pounds, cubs weigh only three to five ounces at birth. This is only 1/900th of the mother's weight! Throughout their lives, pandas look cuddly and soft.

The panda's appearance has made it one of the most popular animals in the world. In the past, China has given other countries pandas as a sign of friendship. Organizations use the image of the panda to encourage the protection of wild animals and promote world peace.
